EDUCATION

Miami University Oxford, OH

Bachelor of Arts, Computer Science, Minor in ETBD. GPA: 3.68. *December 2026*

Relevant Coursework: Web Application Programming, Database Systems, Algorithms, Software Engineering, Interaction Development, User Experience Research, Game Design & Implementation, Systems I & II

SKILLS

Languages: TypeScript, JavaScript, Go, Python, Java, C++, SQL, HTML/CSS
Frameworks & Libraries: Next.js, React, React Native (Expo), Tailwind CSS, Svelte, Prisma, AI SDK
Cloud & DevOps: Docker, GitHub Actions, Azure (App Service, Blob Storage), Vercel, Linux, CAS/SSO
Databases & CMS: PostgreSQL, Supabase, Firebase, Azure Cosmos DB (MongoDB), TinaCMS, Keystatic
Tools: Git/GitHub, OpenAI API, Claude Code, Figma, Jira, Confluence, Photoshop, Unreal Engine 5

CERTIFICATIONS

- CompTIA A+ ce
- HackerRank: Frontend Developer (React), Python
- Certiport IT Specialist: HTML & CSS

EXPERIENCE

Full-Stack Engineering Intern January 2025 – Present

Kroger Technology & Digital *Blue Ash, OH*

- Architected an internal knowledge platform (Next.js, TinaCMS) as sole developer, reaching 3,200+ total visitors
- Built CI/CD pipelines with GitHub Actions for automated builds and deployments to Azure App Service, cutting deploy time by 40%
- Engineered a headless CMS workflow empowering 3+ non-technical designers to self-publish content, saving 5+ developer hours weekly
- Authored 3 framework-agnostic integration guides (PingOne authentication, Pluralsight, Coursera), enabling developers to implement each integration without one-on-one support
- Advised 3+ developers on authentication, system architecture, and tech-stack selection, ensuring alignment with enterprise security standards

PROJECTS

Vettis: AI Candidate Review Platform January 2026 – December 2026

CSE 448/449

- Engineered ~90% of a 4-person capstone hiring platform, automating CV parsing and candidate grading against committee criteria, delivered to a client
- Integrated the OpenAI API with structured prompts to grade 50+ candidate applications, secured via Miami CAS SSO and Docker
- Coordinated a 4-person team across 5 milestone phases, from MVP through user acceptance testing and client handoff

Home Tools September 2026 – November 2026

Personal Project

- Architected 3 self-hosted Go services (game server manager, Discord bot, web control panel) communicating through REST APIs
- Automated management of 2 game servers (Minecraft, Valheim), enabling friends to check status and request whitelist access through Discord

ACTIVITIES & LEADERSHIP

Business Professionals of America December 2024 - Present

Judge

- Evaluate 10+ regional competitors in Python and Web Development, delivering detailed technical code critiques; assess project submissions against BPA national rubrics for accessibility, UI/UX, and logic
